

Educational Goals:

- Scientific informations on bioceramics in order to overcome prejudices and doubts about their safety and reliability in the implant field.
- Learn how to work safety.
- Know different professional opportunities in the dental field
- Find out why the Zirconia implants doesn't cause perimplantitis and are highly recommended on cardiac patients.
- Analyze the Zirconia implants and we will understand why they are very useful on allergic patients.
- See the aesthetic advantages on high demanding patients.
- Acquire knowledge on different Zirconia implant systems for a more aware professional choice.
- Think and act bio-logical, minimally invasive, respecting the tissues and the patient.
- Learn basic procedures for an effective metal-free implants placement.

To whom is addressed?

Dental practitioners, dental technicians, dental hygienists, scientific informants and others medical workers.

Società europea per l'implantologia ceramica

1st Theoretical-Practice Seminar

Scientific Evidences and Clinical Practice

22th June 2019
8:30 - 18:30

Prof. Corrado Piconi

Associate of the Institute of Science and Technology of ceramic materials, ISTEC-CNR Faenza.

Professor at the Medicine and Surgery Faculty, Catholic University of Sacred Heart, Rome.

Member of the scientific council of the European Society for Ceramic Implantology (ESCI) and active member of the Italian Biomaterials Society (SIB), Italian Society of Orthopedics Research (IORS), International Society for Ceramics in Medicine (ISCM).

He was member of the Board of International Academy for Ceramic Implantology (IAoCI). Author of over 100 journal articles and chapters in specialist thesis, with over 2650 citations (March 2019), having as a prevailing reference the zirconia-based ceramics. Has an H-index 30,11 (ResearchGate).

Is scientific advisor of Italian and European ceramic medical devices producing companies.

Dott. Franco Giancola

Already president of the Italian Ceramic Implantology and Holistic Dentistry Association (AICOO) and actual active member of the European Society of Ceramic Implantology (ESCI).

Organizer of the 1st Italian Congress of Ceramic Implantology. Clinical and technical competences in various zirconia implant systems: Sds, Ceraroot, Zirkolith, Bredent, Straumann e Zibone. Consultant in private offices and dental clinics.

Professional activity carried out mainly on patients at risk such as cardiac patients, allergic patients, elderly patients and patients with disabilities in recovery and safe surgeries.

Participation Certificate

At the end of the seminar will be released a attendance and A.I.F.E.S certificate on demand.

Dott. Noran De Basso

He graduated as a dentist at the Institute of Odontology from the Goteborg University and today he works as a maxillo-facial surgeon.

One of the most expert implant surgeons in Sweden, he worked as researcher and professor in Goteborg.

In 1996 has found Svea Tandklinik in Stockholm. Over the years of post-implant problems management and experience he was the engine of new projects and of finding materials to reach this goal.

Rif: the article of the Swedish magazine, Tema Halsä

Schedule

- **8.30** - registration.
- **9:00 - 11:00** - Prof. Corrado Piconi
The Zirconia in Implantology: history, properties and state of art.
- **11:00 - 11.20** - coffee break.
- **11:30 - 13:30** - Dott. Noran De Basso
11 scientific reasons to start using zirconia implants.
- **13.30 - 14.50** - lunch.
- **15.00 - 16.00** - Dott. Franco Giancola
Comparative implant systematics and clinical cases.
- **16.00 - 17.00** Dott. Franco Giancola e Dott. Noran del Basso - Practical tests on models.
- **17.00 - 17.20** - coffee break.
- **17.30 -18.00** - Questions and conclusions.
- **18:00 - 18:30** - Presentation of professional opportunities.
- **18:30** - work completion.
